

COGNITION AND DAILY FUNCTIONING IN HUNTINGTON'S DISEASE (HD)

We are interested in understanding the changes in thinking skills and daily activities experienced by people with HD. Further, we want to gather thoughts on the relevance and suitability of a cognitive intervention program designed to help support thinking skills.

WHO ARE WE LOOKING FOR?

- Aged 18+
- Fluent in English
- People who are HD gene-positive and their loved ones.

WHAT IS INVOLVED?

- 30 minute phone screening interview
- 1-1.5 hours online interview

Participants will be reimbursed \$30 for their time and effort
